## User Manual

---

Thank you for purchasing the LINDY modular solution for mounting numerous displays to your workspace. This range of brackets can hold a single monitor up to 20", two 17" monitors vertically or horizontally, four 17" monitors and three or six 15" monitors at the same time. The brackets and poles are finished with the same silver look and also have the added benefit of a cable management system in the extended arms. Each bracket conforms to the VESA mounting standard (75x75mm & 100x100mm).

This manual will show you how you create the various mounting solutions and how to clamp the poles to your desk. Please take note of the maximum weights supported by each bracket to avoid any damage to your desk or monitors.

**40692:** Short pole with clamp (450mm)

**40693:** Long pole with clamp (700mm)

Both the long and short pole clamp to the desk in the same manner.

**40695:** Single short bracket – Max 10kgs each monitor

**40696:** Single long bracket – Max 10kgs each monitor

**40697:** Double long bracket – Max 6kgs each monitor

Short Bracket

Long Bracket

Adjusting the torque

Both the long and short brackets attach to your monitor in the same way using the screws provided

The single and double long brackets both have a built in cable management system. Feed your cables through the hoops to create a tidier installation.

## User Manual

---

Here are some suggestions on how to use the various components of the modular LCD brackets. These suggestions are for 17" monitors, if you are using 15" monitors you can fit up to six screens on the long pole.

You can use a single short or long arm on the short pole

You can use the long pole with two long or short brackets vertically

You can use two long brackets horizontally or three screens when using 15" monitors and a short single bracket

This setup shows four monitors using the long pole and four long bracket arms. Using the same pole and two short brackets you can have up to six 15" monitors.
